## Agreed-upon procedures report on EITI 2023-2024

### Subject: Extractive Industries Revenue Streams for Fiscal Years 2023 and 2024

To: The Ministry of Finance and Planning of the Republic of Suriname and the Multi-Stakeholder Group of Suriname Extractive Industries Transparency Initiative (hereafter 'EITI')

### Purpose of this Agreed-Upon Procedures Report and Restriction on Use and Distribution

This draft report sets out the activities and factual findings performed by the Supreme Audit Institution (SAI) of Suriname under an agreed-upon procedures engagement. The engagement was mandated by the Multi-Stakeholder Group (MSG) of the Suriname Extractive Industries Transparency Initiative (EITI) to assist the MSG and the Ministry of Finance and Planning in assessing whether the information required under the EITI Standard 2023 has been collected and disclosed correctly for fiscal years 2023 and 2024.

The procedures were performed solely to gather evidence on the completeness and reliability of information on the extractive sector. No assurance conclusion is provided. The MSG is responsible for defining the scope of reporting, determining materiality thresholds and ensuring that entities in the extractive sector provide the necessary data in accordance with the EITI Standard.

This report is intended solely for the Ministry of Finance and Planning and the MSG, and should not be used by, or distributed to, any other parties without consent of the Rekenkamer van Suriname/ Supreme Audit Institution of Suriname.

## **Responsibilities of the Engaging Party**

The Ministry of Finance and Planning has acknowledged that the agreed-upon procedures described below are appropriate for the purpose of this engagement. The Ministry, in consultation with the MSG, is responsible for identifying material revenue streams and entities in the extractive sector.

## **Practitioner's Responsibilities**

We have conducted this agreed-upon procedures engagement in accordance with ISRS 4400, *Agreed-Upon Procedures Engagements*. An agreed-upon procedures engagement involves our performing the procedures that have been agreed upon with the Ministry of Finance and the MSG and reporting the factual findings. We make no representation regarding the appropriateness of the procedures described below. This engagement is not an assurance engagement and, accordingly, we do not express an audit opinion or assurance conclusion.

Had we performed additional procedures, other matters might have come to our attention that would have been reported.

## **Professional Ethics and Quality Control**

Our firm applies the International Standard on Quality Management (ISQM) 1, *Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements*, and maintains a process of reviewing audit reports by the management and certified accountant.

## **Activities performed per EITI requirement and factual findings**

The 2023 edition of the EITI Standard (published in June 2023) requires implementing countries to disclose information along the entire decision-making chain. This report summarises the procedures carried out by the SAI for each relevant requirement and references the EITI provisions where appropriate.

## **Requirement 1 – Oversight by the multi-stakeholder group (MSG)**

### *Activities performed*

Government, company and civil-society engagement (Req 1.1–1.3). We reviewed correspondence, minutes and attendance lists to confirm that senior officials from the Ministry of Finance and Planning, the Ministry of Natural Resources (MNR), state-owned enterprises (SOEs) and civil-society organisations continued to participate in the MSG. According to the website of EITI Suriname, <https://eitipuriname.gov.sr/minutes/>, the MSG met seven times in 2023 to oversee the work programme.

We have not received minutes of meetings of MSG in 2024. According to the Terms of Reference the MSG should meet at least six times per year.

MSG governance and work plan (Req 1.4–1.5). We inspected the MSG's updated terms of reference, which were approved in July 2023.

We noted no work plan included costed activities aligned with national priorities (e.g., establishing a license register, digitising revenue streams and integrating EITI disclosure in state-owned enterprises).

## **Requirement 2 – Legal and institutional framework, contracts and licences**

### *Activities performed*

Legal and fiscal framework (Req 2.1).

We have not obtained the legal framework governing oil, gas and mining, including the 1986 Mining Decree, the Petroleum Law 1990 and fiscal regulations. The MSG mentioned that a consultant has been appointed and presented a legal framework in 2017.

In the discussion with the MSG, we noted that the mineral activities of Suriname include quarrying of gravel, sand, clay and stone as well as the production of iron ore, gold, petroleum and cement.

Contract and licence allocations and register (Req 2.2–2.3). We have not received information regarding the licence allocation procedures and did not have access to the existing licence register maintained by the Geological Mining Department (GMD).

Since we do not have been provided a list of mining licences, the register could not be compared to the register with corporate filings at the Chamber of Commerce to verify completeness.

Contracts and licence disclosure (Req 2.4). We requested samples of contracts and licences for major mining and oil projects, which have not been shared.

Beneficial ownership (Req 2.5). We assessed progress towards establishing a beneficial ownership register. Legislation mandating beneficial ownership disclosure has not yet been enacted.

State participation (Req 2.6). We confirmed that Staatsolie (the national oil company) disclosed their financial statements.

However, other SOEs, such as Grassalco (the state mining company), the Rosebel Community Fund and the Staatsolie Foundation for Community Development, had not published their financial data.

### **Requirement 3 – Exploration and production**

#### *Activities performed*

Exploration activities and production data (Req 3.1–3.3). We requested but have not obtained exploration and production data for gold and oil from the Ministry of National Resources (MNR) and the GMD. Production of industrial minerals (sand, gravel, clay and stone) was poorly recorded.

Greenhouse gas emissions (Req 3.4). The 2023 EITI Standard introduced new disclosures on greenhouse-gas emissions. We observed that neither the MNR nor companies reported emissions data. No methodology has been agreed upon by the MSG to report such data.

In Appendix 2 environmental statistics have been shared by the General Bureau of Statistics (December 2024) of Zijin - Rosebel Gold Mines. Grassalco, Newmont and Staatsolie.

### **Requirement 4 – Revenue collection**

Requirement 4 comprises several sub-requirements. The SAI's work focused on the revenue streams considered material by the MSG.

#### *Activities performed*

Determining materiality (Req 4.1). We discussed with the MSG's the method of determination of materiality.

The EITI guidance explains that the MSG should (1) understand the revenue streams, (2) establish which streams are material and whether thresholds are needed, (3) identify reporting entities, and (4) document its deliberations. The MSG examined revenue data from the MNR and the Ministry of Finance.

The threshold for revenue streams was set at SRD 195,000 per fiscal year (USD 5,000). Payments and revenues are considered material if their omission could significantly affect the comprehensiveness of the EITI report.

- Scope of entities. The MSG identified five large mining companies and one state-owned mining company, twelve oil-and-gas companies and one state-owned oil company (Staatsolie), twenty-three gold exporters and seventeen small and medium-scale mining companies, in line with the 2021-2022 report. Entities whose payments fell below the threshold were considered immaterial.
- Qualitative exclusions. The MSG also considered the nature of the companies. Quarrying operations producing sand, gravel and granite for construction purposes (approximately 30 small permit holders) were excluded from the scope due to qualitative reasons.

Quarrying is part of Suriname's mineral activities; the MSG acknowledges that that revenues from these companies should have been included.

Revenue stream coverage and reconciliation (Req 4.1–4.3). We obtained the list of material revenue streams: royalties (cash and in-kind), corporate income tax, import duties, sales tax, concession fees, wage tax and AOV premiums, dividend tax and dividends from SOEs.

The list did not include exploration and exploitation fees, lease payments, signature bonuses, penalties.

In accordance with the EITI Standard, government entities and companies should disclose material revenues and payments; the MSG must agree materiality definitions and thresholds and document their rationale. We compared the payments reported by companies with receipts recorded by the Ministry of Finance and the Central Bank of Suriname (CBvS).

Sale of the state's share of production (Req 4.2). No sales of production in kind were reported by oil and mining companies.

Infrastructure provisions and barter arrangements (Req 4.3). The MSG reported that there are no barter or infrastructure-for-resource arrangements in the reporting period.

Transportation revenues (Req 4.4). No material transportation revenues have been reported.

Transactions related to SOEs (Req 4.5). We reviewed transfers between SOEs and the Treasury. Dividends from Staatsolie were confirmed with the bank statements and the financial statements.

As mentioned earlier, we could not obtain audited statements for Grassalco, the Rosebel Community Fund or the Staatsolie Foundation for Community Development.

Subnational payments (Req 4.6). The MSG determined that no direct payments to sub-national governments exceeded the materiality threshold.

There is no information available of royalty-sharing arrangements with Indigenous communities are handled through national entities and are included in national revenue streams.

Level of disaggregation (Req 4.7). The 2023 EITI Standard requires disaggregation by individual project, company, government entity and revenue stream. We examined the data templates provided by the MSG and confirmed that revenue data is disaggregated by company (for the large oil and mining companies) and revenue stream. However, disaggregation information for the small-scaled mining companies and quarrying companies were not disclosed.

Project-level disaggregation was not achieved for mining licences; revenues were reported only at the entity level.

Data timeliness (Req 4.8). The Standard requires that disclosures be no older than the second to last complete accounting period. The 2023 -2024 report, covering fiscal year 2023 and 2024, was prepared by October 2025, within the permitted timeframe, but data for both financial years remained outstanding as mentioned in earlier mentioned paragraphs.

Data quality and assurance (Req 4.9). We assessed whether revenues were subject to credible, independent audits. The Standard requires government and company disclosures to be audited in accordance with international audit standards and for the MSG to document assurance procedures.

We obtained audit reports from Staatsolie and Newmont Suriname, but Grassalco's audit was outdated (2017). For small and medium-scale miners and gold exporters, no audited financial statements were available. The SAI performed limited procedures (bank statement review and tax authority confirmation) due to time and resource constraints.

Project costs (Req 4.10). The 2023 Standard introduced disclosures on monitoring project costs and government policies for managing revenue-loss risks. The MSG has not yet adopted a mechanism to collect such data.

## **Requirement 5 – Revenue management and distribution**

### *Activities performed*

Distribution of revenues and public finance management (Req 5.1). We reviewed whether government revenues from extractive industries are recorded in the national budget. Suriname operates a Treasury Single Account (TSA) at the CBvS for most revenues; however, some fees collected by the GMD and the Foreign Exchange Commission were retained off-budget.

No reconciliation exists between the TSA and the budget classifications.

Subnational transfers (Req 5.2). No material subnational transfers were identified, and no legal framework exists for sharing revenues with local governments.

Additional information on revenue management and expenditures (Req 5.3). The MSG did not publish information on revenue forecasts, budget assumptions, or spending plans. Citizens therefore cannot assess whether extractive revenues are used for development priorities.

## **Requirement 6 – Social and economic spending**

### *Activities performed*

Social and environmental expenditures (Req 6.1). We requested disclosures of social expenditures made by SOEs and extractive companies. Staatsolie and the Staatsolie Foundation for Community Development invested approximately US\$ 3 million in social initiatives in 2024. Contributions were made in areas such as healthcare, education and support for the disadvantaged community development projects.

No information on social expenditures is made available from Rosebel and Newmont.

Quasi-fiscal expenditures (Req 6.2). We reviewed SOE financial statements to identify quasi-fiscal activities (e.g., subsidised fuel, infrastructure works). Due to limited data, we could not quantify such expenditures.

Contribution to the economy (Req 6.3). The MSG disclosed macroeconomic indicators (contribution of oil, gas and mining to GDP, exports and employment) but lacked data on building materials (from quarrying companies).

Environmental and social impact (Req 6.4). No disclosures on environmental impacts or greenhouse-gas emissions were provided by MSG.

Also see Appendix 2 of Environmental Statistics as provided by the General Bureau of Statistics (December 2024) from Zijin - Rosebel Gold Mines. Grassalco, Newmont and Staatsolie.

## **Requirement 7 – Outcomes and impact**

### *Activities performed*

Public debate (Req 7.1). We assessed outreach activities. There is no evidence that MSG organised workshops in Paramaribo and in the interior to raise awareness on EITI.

Data accessibility and open data (Req 7.2). The EITI Suriname website contains summary data but not machine-readable datasets.

Recommendations from EITI implementation (Req 7.3). The MSG did not address the recommendations from the 2021-2022 report, such as establishing a license register, ensuring independent audits, developing a work plan and refining the materiality methodology.

## Summary of Factual Findings

The observations below are based on the procedures performed and should be read together with the activities described above. They are presented without interpretation or assurance and may not represent all deficiencies in the underlying systems.

### Materiality determination

The MSG documented its deliberations on materiality and set quantitative thresholds (USD 5.000) in accordance with EITI guidance. The threshold captured the vast majority of extractive revenues; however, the MSG did not calculate the total revenues collected from the extractive sector and therefore could not quantify the share of immaterial streams, replicating an issue identified in the 2021-2022 report.

Approximately 30 small quarrying companies producing sand, gravel and granite were excluded.

### Completeness of revenue disclosures

Several revenue streams were not fully disclosed. We could not obtain import duties, customs fees and some non-tax revenues from the Ministry of Finance. The GMD did not provide complete information on surface rents and land rents.

Disaggregation by project was not achieved. Revenue data was provided at the company level despite the EITI requirement for project-level disaggregation.

### Data quality and assurance

Only a few companies (Staatsolie and Newmont) submitted audited financial statements. Grassalco's latest audit report dates from 2017. No audited statements were available for gold exporters and small or medium-scale miners.

Government revenue figures were not subjected to independent audit. The SAI performed limited procedures such as reviewing bank statements and tax confirmations. There was no formal assurance mechanism for the completeness of revenues, contrary to Requirement 4.9 of the EITI Standard.

### Operational process observations

Weak record-keeping. The GMD's licence register is incomplete and maintained manually. There is no unified system linking licence data, production volumes and revenue collection.

Inadequate reconciliation. The Ministry of Finance and Planning, the CBvS and the Tax Authority operate separate systems. In many cases, receipts from small and medium-scale miners were recorded in aggregate, impeding detailed verification.

Lack of IT controls. Agencies rely on spreadsheets and manual processes. There are no documented IT general controls, user-access controls or audit trails.

## Comparison with 2021-2022 findings

The findings above are consistent with the issues reported in the previous agreed-upon procedures report for 2021-2022, which noted incomplete revenue disclosures, missing materiality thresholds, absence of project-level disaggregation and lack of independent audits.

## Recommendations (non-assurance observations)

While outside the scope of agreed-upon procedures, the SAI offers the following observations for the MSG's consideration:

1. Establish a comprehensive license and company register. The MSG should ensure that the MNR and GMD develop an electronic register covering all extractive licences, including quarrying permits. This register should include license owners, contract terms and payment obligations.
2. Strengthen materiality assessment. The MSG should calculate total extractive revenues for the reporting period to determine the share of excluded payments.
3. Enhance reconciliation and IT controls. The Ministry of Finance and Planning and the CBvS should implement an integrated revenue management system. Regular reconciliations between bank receipts, tax records and licence data will improve accuracy.
4. Improve audit and assurance processes. All material companies, including SOEs and gold exporters, should publish audited financial statements. Government agencies should subject revenue figures to independent audit.
5. Clarify Enforcement of the Financial Reporting Act (2017). We recommend identifying and mandating the competent authority responsible for enforcing compliance with the Financial Reporting Act of 2017, particularly regarding the obligation of extractive companies to publish timely and complete financial statements.
6. Include project-level data and environmental disclosures. Future reports should provide project-level disaggregation and disclose greenhouse-gas emissions and environmental payments in line with the new EITI Standard requirements.
7. Integrate EITI Disclosure into Annual Financial Statements. We recommend including a dedicated EITI disclosure appendix in the annual financial statements of material extractive companies. The EITI-relevant disclosures may also be included in the Director's Report, which should be subject to audit by the external auditor.
8. Reconcile Accrual-Based Liabilities with Cash-Based Payments. To support a comprehensive understanding of extractive company tax positions, we recommend disclosing a reconciliation of liabilities (accrual accounting) with actual payments (cash basis). This reconciliation will facilitate more meaningful reporting and validation in EITI reports.

## Conclusion

The absence of key supporting documents, particularly those related to Wage Tax, AOV, royalties, and non-tax receipts, may hinder full verification of material revenue flows as required under EITI standard 2023. Additional efforts are necessary to ensure source documentation is made available by relevant agencies.

Signed,

Onderwerp: **Cover letter to the report of factual findings – ISRS 4400 engagement**  
Subject

Paramaribo, 19 december 2025

Issued by: Rekenkamer van Suriname (Supreme Audit Institution of Suriname)

Dear Sir or Madam,

We hereby present the accompanying Report of Factual Findings for the financial year 2023 and 2024, which has been prepared at the request of the relevant stakeholders in connection with the Extractive Industries Transparency Initiative reporting process. This report should be read in conjunction with this letter and forms an integral part of the agreed-upon procedures engagement.

The procedures described in the report were performed in accordance with International Standard on Related Services 4400, Agreed-Upon Procedures Engagements, as issued by the International Auditing and Assurance Standards Board. The nature, timing and extent of the procedures were agreed in advance with the engaging parties. Our responsibility was limited to performing the agreed-upon procedures and reporting the factual findings resulting from those procedures.

It is important to emphasize that the engagement did not constitute an audit or a review conducted in accordance with International Standards on Auditing or International Standards on Review Engagements. Accordingly, no assurance opinion or conclusion is expressed on the information subject to the agreed-upon procedures. Users of the report should not interpret the factual findings as providing any level of assurance.

Furthermore, during the performance of the agreed-upon procedures, it became apparent that the availability and quality of underlying supporting documentation were insufficient in several instances. As a result, our factual findings are inherently constrained by the limitations in the underlying evidence provided to us. We did not perform procedures to obtain additional evidence beyond what was made available, nor were we required to do so under the agreed-upon procedures framework.

This report is intended solely for the purpose described in the terms of reference and for the use of the intended users who have agreed to the procedures. It should not be used for any other purpose or distributed to other parties without our prior written consent.

Signed,

Mr. drs S. Bhoendie  
[Chairman of the Board of Rekenkamer van Suriname/Supreme Audit Institution of Suriname]

Cyril Soeri MA, RA, CA, CISA, CIS LI, CEH  
(Consultant)

# Appendix 1: Information requested

## Introduction

1. The MSG's materiality determination (list of companies within scope).
2. Approved 2023-2024 work plan and MSG-approved reports.
3. MSG validation of findings from the 2021-2022 EITI report.
4. Ministry of Natural Resources:
  - a. Complete list of companies and individuals holding concession rights, permits and licences.
  - b. Statistics on fees, surface rents and royalties for 2023-2024.

*Note:* The recommendations of the 2023-2024 report will state that improvements for the 2024 EITI report will be undertaken in 2026. The due date for the 2023 report is 30 December 2025, and for fiscal year 2024 the due date is 30 December 2026. See the EITI Standard 2023, Part 2, Section 2 for further details.

## Required documentation related to the EITI requirements

Sub-requirement	Documentation requested and not received
1 Oversight by the multi-stakeholder group	<ul style="list-style-type: none"> <li>• Minutes of meetings of financial year 2024 not received.</li> </ul>
2.1 Legal framework and fiscal regime	<ul style="list-style-type: none"> <li>• Official list of laws and regulations with references to the Staatsblad (Official Gazette).</li> <li>• Minutes of MSG discussions on fiscal frameworks.</li> </ul>
2.2 Contract and licence allocations	<ul style="list-style-type: none"> <li>• Award protocols and decisions from the Ministry of Natural Resources (MNR) and the Geological Mining Department (GMD).</li> <li>• Summary of MSG discussions about fairness in licence awards.</li> </ul>
2.3 Register of licences	<ul style="list-style-type: none"> <li>• GMD registers and the Staatsolie blocking register.</li> <li>• MSG statement confirming that the registers are current.</li> </ul>
2.4 Contracts	<ul style="list-style-type: none"> <li>• Copies of concession and PSC contracts.</li> <li>• MSG resolution on contract disclosure.</li> </ul>
2.5 Beneficial ownership	<ul style="list-style-type: none"> <li>• Beneficial-ownership register (Excel or database).</li> <li>• Minutes of MSG meetings validating the definition of beneficial ownership.</li> </ul>

Sub-requirement	Documentation requested and not received
2.6 State participation	<ul style="list-style-type: none"> <li>• Annual financial statements of state-owned enterprises (SOEs), board decisions on dividends and MSG report on SOE financing.</li> </ul>
3.1 Exploration activities	<ul style="list-style-type: none"> <li>• Overview of exploration permits.</li> <li>• MSG report on monitoring of exploration activities.</li> </ul>
3.2 Production data	<ul style="list-style-type: none"> <li>• Production data from CBvS and GMD.</li> <li>• MSG resolution on data reliability.</li> </ul>
3.3 Export data	<ul style="list-style-type: none"> <li>• Customs statistics and CBvS export figures.</li> <li>• MSG meeting notes on export-data discussions.</li> </ul>
3.4 Greenhouse-gas emissions	<ul style="list-style-type: none"> <li>• Environmental annual reports and NIMOS (National Institute for Environment and Development in Suriname) reports.</li> <li>• MSG discussions on climate-impact reporting.</li> </ul>
4.1 Comprehensive disclosure of taxes and revenues	<ul style="list-style-type: none"> <li>• Materiality memorandum and decisions on the BDO reporting template.</li> <li>• MSG decision on the scope of reporting.</li> </ul>
4.2 Sale of the state's share of production or revenues collected in kind	<ul style="list-style-type: none"> <li>• Staatsolie sales reports.</li> <li>• MSG minutes confirming verification of these figures.</li> </ul>
4.3 Infrastructure and barter arrangements	<ul style="list-style-type: none"> <li>• Barter-deal contracts.</li> <li>• MSG report evaluating the value of barter deals.</li> </ul>
4.4 Transportation revenues	<ul style="list-style-type: none"> <li>• Tariff schedules and annual reports from transport authorities.</li> <li>• MSG minutes confirming the figures.</li> </ul>
4.5 SOE transactions	<ul style="list-style-type: none"> <li>• SOE financial statements of Grassalco and dividend reports.</li> <li>• MSG discussion records on SOE transactions.</li> </ul>
4.6 Subnational payments	<ul style="list-style-type: none"> <li>• Overview of district transfers.</li> <li>• MSG discussions on regional transparency.</li> </ul>
4.7 Level of disaggregation	<ul style="list-style-type: none"> <li>• Disaggregation template.</li> <li>• MSG approval minutes.</li> </ul>
4.8 Data timeliness	<ul style="list-style-type: none"> <li>• Report-publication schedule and MSG annual work agenda.</li> </ul>
4.9 Data quality and assurance	<ul style="list-style-type: none"> <li>• MSG report on the choice of risk-based or reconciliation methodology.</li> <li>• Terms of reference for internal audit and the validation protocol.</li> </ul>

Sub-requirement	Documentation requested and not received
4.10 Project costs	<ul style="list-style-type: none"> <li>• Project cost reports.</li> <li>• MSG validation reports.</li> </ul>
5.1 Distribution of revenues	<ul style="list-style-type: none"> <li>• National budget summaries.</li> <li>• MSG minutes on revenue allocation.</li> </ul>
5.2 Subnational transfers	<ul style="list-style-type: none"> <li>• Transfer decrees from the Ministry of Finance and district budgets.</li> <li>• MSG minutes.</li> </ul>
5.3 Revenue management & expenditures	<ul style="list-style-type: none"> <li>• Reports on funds (e.g., SEMiF).</li> <li>• MSG evaluation reports.</li> </ul>
6.1 Social & environmental expenditures	<ul style="list-style-type: none"> <li>• Corporate social responsibility reports (e.g., Newmont, Rosebel, Staatsolie).</li> <li>• MSG validation records.</li> </ul>
6.2 Quasi-fiscal expenditures	<ul style="list-style-type: none"> <li>• SOE financial statements and government decisions authorising the expenditures.</li> <li>• MSG discussion records.</li> </ul>
6.3 Contribution to the economy	<ul style="list-style-type: none"> <li>• CBvS reports.</li> <li>• MSG meeting notes on validation.</li> </ul>
6.4 Environmental impact of extractive activities	<ul style="list-style-type: none"> <li>• Environmental reports from NIMOS and inputs from non-governmental organisations (NGOs).</li> <li>• MSG discussion points.</li> </ul>
7 Outcomes and impact	<ul style="list-style-type: none"> <li>• Not applicable: no further documentation requested.</li> </ul>

## Other documentation requested and not received

### Automation and information systems

- Systematic disclosure: integration of EITI requirements into existing systems, such as enterprise resource planning (ERP) systems and the Treasury Single Account.

### Central Bank of Suriname (CBvS):

- Bank-connection procedures for the Treasury Single Account.
- Statistics on gold exports.
  - Description of the IT systems used by the Tax Authority and the Ministry of Finance.
  - Integration of EITI requirements into existing systems.
  - Description of IT general controls and audit trails.

### **Materiality determination (EITI Requirements 4.1(c) and 4.7)**

- Methodology for setting materiality thresholds.
- Application to Suriname: material flows (royalties, dividends, tax, concession rights).
- Relationship with the national budget and CBvS statistics.

### **Assessment of the administrative organisation (AO) and system of internal controls (SIC) at EITI bureau**

- Process analysis of the assessment and collection of government receipts:
  - Process analysis of levying and collecting government revenues.
  - Procedure for recording government receipts.
  - Roles and responsibilities of the Ministry of Finance (MoF), CBvS and the Geological Mining Department (GMD), including segregation of duties and internal checks & balances.
- Budget accounts containing quasi-fiscal expenditures (EITI Requirement 6.2).
- Policies and procedures for registering receipts.
- Internal control mechanisms at state-owned enterprises (e.g., Staatsolie).
- Controls over reconciliations and bank account reconciliations.

#### *IT controls*

- Access rights and segregation of duties.
- Logging and monitoring of transactions.
- Cyber-security aspects (relevant to the Treasury Single Account).

## Appendix 2: Environmental Statistics of extractive companies

Environmental Statistics had been discussed at the MSG meeting in Oktober 2025, but no further environmental information had been shared with the Supreme Audit Institution.

However, we noted that below relevant information has been shared in the publication “Environmental Statistics 2019-2023” from the General Bureau of Statistics (December 2024), which provided statistics shared from Zijin - Rosebel Gold Mines. Grassalco, Newmont and Staatsolie.

Emissie van Grassalco	Emissions of Grassalco
In 2021 was de broeikasgas uitstoot van Grassalco 2.988 ton CO <sub>2</sub> e (zie tabel 12.16).	In 2021, the emission of greenhouse gases from Grassalco was 2,988 tonnes CO <sub>2</sub> e (see table 12.16).

**Tabel 12.16: Broeikasgasemissie mijnbouwactiviteiten Grassalco, 2019-2021**  
**Table 12.16: Greenhouse Gas Emissions Mining Activities Grassalco, 2019-2021**

Parameter	Eenheid/ Unit	2019	2020	2021
Broeikasgasemissie/ Greenhouse Gas Emissions	Tonnes CO <sub>2</sub> e	1,869	5,721	2,988

## Appendix 3: Information flow for government receipts from extractive companies

To evaluate the completeness of government revenues from the extractive sector, we should have performed walkthroughs at the Ministry of Finance and Planning, the CBvS, the GMD and selected companies. The procedures performed were limited to interviews with management.

The process description below summarises the flow of information and funds:

1. Licensing and contract stage. The GMD (Ministry of Natural Resources) grants exploration and exploitation licences and collects application fees, annual concession fees and surface rents. Information on licenses and payments should be recorded in the GMD's licensing system and communicated to the Ministry of Finance. Our review noted that licensing data is maintained manually and is not shared systematically.
2. Production and revenue calculation. Companies record production volumes and Kaloti calculates royalties for the gold exporting companies and taxes based on rates set by law or contracts. Small gold producers send their gold to the gold purchase companies based on which the royalties are calculated. For large mining and oil companies, royalty rates range from 2% to 6% of gross production value. Companies should submit periodic returns to the Directorate of Taxes and to the Mineral Institute.
3. Payment and receipt:
  - *Royalty, tax and fee payments.* Companies pay royalties, corporate income tax, wage tax, value added tax and other fees to the Ministry of Finance and Planning at the CBvS or through commercial banks. The Tax Authority issues receipts and records payments in its tax administration system.
  - *Dividends and profit transfers.* SOEs such as Staatsolie and Grassalco calculate dividends after audits and transfer profits to the Ministry of Finance and Planning.
  - *In-kind contributions.* If companies deliver gold or oil in kind to the government, the state sells the commodity and deposits the proceeds into the Ministry of Finance and Planning. No such transactions were reported for 2023–2024.
4. Recording and consolidation. The Ministry of Finance and Planning consolidates revenue data in the Treasury ledger and prepares monthly statements. Ideally, data from the GMD (licence fees), the CBvS (bank statements) and the Tax Authority should be reconciled. In practice, reconciliation is weak and agencies operate siloed systems.
5. Reporting to the MSG. The Ministry of Finance and Planning compiles revenue data by company and revenue stream and submits it to the MSG. Companies complete data templates and provide supporting documents (audited financial statements or bank confirmations).
6. Independent verification. Under the agreed-upon procedures, the SAI verifies the completeness of revenue streams by comparing company submissions, tax receipts, bank statements and SOE financial statements. For revenues below the materiality threshold, unilateral government disclosure is relied upon.

## Appendix 4: GMD list of licences provided

No list of licences provided by the Ministry of Natural Resources have been provided. Below list of licences provided is extracted from the BDO's EITI Inception report 2023-2024. Holders of multiple licences are mentioned once:

GMD Number	Name	Date of Submission	Date of termination	Type of Mining	GMD Number
662/20	A.C. Bos Gold Mining N.V.	5/21/2020	5/21/2023	Exploratie	14368
569/20	Aannemings - Maatschappij Baitali	4/8/2020	4/8/2025	Bouwmaterialen	375
